SKILLS

Languages:

C++ • Java • Javascript • HTML
CSS • React • C • Python

Technical Skills:

Data Structures and Algorithm

Frameworks and Tools:

React • MongoDB • Nodejs • JQuery
Git • Github

Soft Skills:

Time Management • Communication
Problem Solving • Leadership

PROJECTS

TO-DO-LIST | [Github](#) | [Link](#)

- Planning out schedule and setting tasks for the day.
- Framework and Package used : Nodejs and Express
- Frontend created using Ejs, CSS and Javascript.
- Database management done using Mongoose and MongoDB.

CHATAPP | [Github](#) | [Link](#)

- User-friendly and secure chat application that allows you to engage in private conversations with your friends in a dedicated virtual room.
- Frontend created using React and Backend is implemented using NodeJs and Express.
- Messages are saved in MongoDB Atlas Database
- The communication via server and client is done through Socket-io.

PORTFOLIO WEBSITE | [Github](#) | [Link](#)

- HTML and CSS used for frontend.
- Typed animation and Scroll Reveal implemented using Javascript.

KEEP APP | [Sandbox](#) | [Link](#)

- Created using fundamentals of React such as functional components, React Hooks, States, Modules, Material UI, Mapping, Object destruction, Props, etc.

ACHIEVEMENTS

100 DAYS OF CODE BY CODEIN COMMUNITY | [Link](#)

Jul 2022 - Oct 2022

Solved a new problem continuously from day-1 to day-100 in Codechef

GOOGLE KICK START 2022 | [Link](#)

Jul 2022

Participated in Google Kick Start 2022 with 6872 rank in round G.

META HACKERCUP | [Link](#)

Sept 2022 - Oct 2022

Progressed to Round 1 OF 2022 Meta HackerCup with a global rank of 8545 in the qualification round.

HACKTOBERFEST 2022 | [Link](#)

Oct 2022

For officially getting (4+1)/4 pull request merged and verified in hactober fest 2022

EXPERIENCE

OASIS INFOBYTE | WEB DEVELOPMENT AND DESIGNING

Apr 2023 - May 2023

I chose level 2 out of three options for a project, which involved designing a basic todo web app, a tribute page, and a simple calculator. The tasks utilized MongoDB as the database for storing todo app tasks, while the frontend was developed using HTML, CSS, and JavaScript. The backend was implemented using Node.js.
